Powell, OH geoAMPS, a technology company in the Columbus, OH, area, announces that the mobile application it developed for the International Right of Way (IRWA) Education Conference is ready to download.

IRWA's annual International Education Conference will be held June 23-26 in Charleston, W.Va.

*geoAMPS was the first to provide mobile technology to the right of way industry. This innovation offers right of way agents the ability to stay connected with the project database or upload data even when in the field. In a similar fashion, the conference mobile app developed by geoAMPS provides attendees the ability to obtain event information while on the go.*

geoAMPS proudly provides the mobile application as part of its Platinum Sponsorship. This marks the second consecutive year that geoAMPS has built the mobile app for the conference.

"I am pleased to offer this mobile app to IRWA and those attending the

conference. geoAMPS is committed to advancing technology within the right of way industry,” Yogesh Khandelwal, President and Chief Executive Officer of geoAMPS, said. “The IRWA conference app helps demonstrate how mobile technology can be utilized to share information and simplify communication, a capability that offers tremendous efficiencies to right of way projects, and in this case, conference attendees.”

geoAMPS was the first to provide mobile technology to the right of way industry. This innovation offers right of way agents the ability to stay connected with the project database or upload data even when in the field. In a similar fashion, the conference mobile app developed by geoAMPS provides attendees the ability to obtain event information while on the go.

For 2013, geoAMPS has incorporated enhancements suggested by last year’s users. One of the improvements is a page titled ‘Local’ that includes a restaurant finder, hotel finder and IRWA offsite event locator. This improvement provides attendees with information on local attractions, including places to eat that are popular with Charleston residents, hotel locations and official IRWA offsite events. In addition, the built-in map provides users venturing outside of the conference the ability to see their location in reference to other amenities and events.

The app offers a wealth of information about the conference itself. There is introduction to conference sponsors, a map of the conference area with booth occupants identified, and information about various sessions, guest speakers and other conference events.

The IRWA 2013 mobile application is available on Apple- and Android-powered mobile devices. To download the conference app, follow these instructions based on your mobile device:

**For Android:** Search ‘IRWA 2013’ in the Google Play Store app on your mobile device or click [here](#) to locate the app in your computer’s browser.

**For Apple:** Search ‘IRWA 2013’ in iTunes on your mobile device or in your iTunes account on your computer or click [here](#) to locate the app in your computer’s browser.
