geoAMPS, a technology company developing land rights and infrastructure assets for its global customers, will participate in CANWEA's 28th Annual Conference and Exhibition Oct. 14-17 in Toronto.

"The geoAMPS team is looking forward to exhibiting at CANWEA 2012," Yogesh Khandelwal, Chief Executive Officer of geoAMPS, said. "The CANWEA conference and events are targeted to help its members and key stakeholders engage on issues key to the wind energy industry. Our team will be pleased to share information on our industry-leading comprehensive solution for end-to-end management of wind and other alternative energy projects."

A part of the geoAMPS product line, altAMPS is tailor-made for the alternative energy industry. It is filled with time-saving tools, such as lease management, met tower management, royalty payment calculator, bulk update, automatic reminders, payment tracker, and work-flow capabilities. Best of all, altAMPS offers solutions that are paperless. Client staff can utilize altAMPS Web-based software on computers in the office or in the field or on their mobile devices. It's a cost-saving system that supports and encourages sustainable sources of energy.

About CANWEA 2012

CanWEA's 28th Annual Conference and Exhibition will be held October 14-17, 2012, in Toronto. This premier wind energy event will bring together more than 2,500 experts from all over the world to discuss the opportunities and latest developments in the wind energy industry. The exhibition will feature more than 250 exhibiting companies and will provide companies with an exclusive opportunity to network and generate new business leads.
